

MG41E and MG51E Cellular Dipole Antenna Datasheet

Note - Do not mix MG21E, MG41 and MG51E dipole antennas

The dipole antennas (MA-ANT-C2-A) are included with the MG41E and MG51E. When in use the dipoles have a spherical coverage in comparison to a patch antenna. The dipole antennas will excel at allowing users to place the MG in areas where a directional patch antenna cannot be mounted. The dipoles are directly attached to the MG41E/MG51E and require no additional mounting hardware.
